1. Dedicated to honesty and community

We are proud to share this document with the community to help promote development of projects on the protonchain.

With 30 years of experience in ERP and business software development. We're faithful and sure that the knowledge we've gained is the service you're looking for.

This idea is about mass enterprise adoption of blockchain technology and cryptocurrency in which we firmly believe as we develop integrations with AI partners.

We will be ready for near achievements of Protonchainn:

- Fiat in/off ramp.

- First National Blockchain Bank and Trust.
- EUR stable coin on proton chain.
- Regulations on crypto is a must and Protonchain is leading.

1. Our Products, Technology, Skills ect.

We will demonstrate our technological capacity. This is why:

- We are Protonchain Block producers.
- We build pre-alpha versions of wallets in Android, windows, ios, MacOS and Linux.

2. Total Proton

- An incubator for a B2B payments, including all the invoicing formats, PDF file and standard XML electronic invoice files.
- Total Proton is developing a wallet and API to send and receive information from the ERP simplifying all accounting process.

Benefits:

- > Automation. Time spent.
- > Cost reductions across departments.
- > Blockchain technology.
- > Global Acceptance of e-invoicing.
- > Cash flow increase.
- > Improvements in security and fraud.
- > Customer relationships improved.
- > Administration accomplishing
- > Using proven cryptographic technology.
- Everything is easy and fast as it is in the proton wallet.
- Businesses will need a wallet for their usual operations.
- For businesses to send an invoice, account for it and pay fir it could be as fast as 4000tx/s.
- Possibility to allow invoice payments with all xTokens from protonchain ecosystem.
- Invoice information can be only available for the counterparts.
- Developing connectors for industry standards SAP, quickbooks, sage, woocommerce

3. Why we chose Protonchain

- Idea is not new, what it makes different is proton chain.
- No fees for currency transactions. You can send an 0.01\$ invoice payment.
- Smart contracts.
- KYC.
- Instant transaction. 4000 tps.
- Fiat on /off ramp
- USD stablecoin
- EUR stablecoin (hope in the future)

4. Why TUTU Token?

- TUTU token is for paying services fees.
- 50% discount when fees are paid with \$TUTU, users will be allowed to pay fees with all other coins as well.
- To avoid micro-billing by using \$TUTU!
- Why the need to pay fees for the service? transactions on protonchain need system resources.
- Less fees equal more total income for business!
- Telenomics being defined and transparent!

5. Our FUTURE

- Development of a Lending and Borrow system to let customers and providers advance the invoice payments offering and APR
- Payer reputation system.
- Not only invoices, also order systems.
- Automatic accomplishing for tax agency.

6. Financing project.

We are continually working on the projects financing.

- Preparing a Financial Round with early VP.
- TUTU Selling.

7. TotalProton BP

We run a Proton chain Block producer node on our datacenter.

As a tech company we really believe in make protonchain stronger and become a Block Producer is one way. Developing Apps is the other.

8. Road Map

1. Getting TUTU Token for registering.
2. Become a Block Producer.
3. Develop a wallet and all tech knowledge on alpha stage.
4. Develop smart contracts.
5. Start financial round.
6. Go to Beta software stage.
7. Develop connectors.
8. Security audits.
9. Total proton service goes live.

9. Conclusion

We are very excited to share our project with the community to make it growth, you can send you comment on Telegram Group: https://t.me/tutu_totalproton
